SUMMARY

Experienced Front-end Web Developer, skilled in developing responsive web applications using React.js, Node.js, and Git. Strong troubleshooter with an eye for optimization and security. Collaborates well with cross-functional teams and has excellent end-user support skills. As a successful UpWork freelancer, I have leveraged my strong business acumen and ability to understand client requirements to deliver customized solutions that exceed expectations. Dedicated to improving website functionality and user experience through continuous development and maintenance."

EXPERIENCE

Freelance Front-End Developer

UpWork

August 2022 - Present, Remote

- Developed and maintained responsive web applications for clients on UpWork, utilizing technologies such as React.js, Node.js, and Git.
- Demonstrated expertise in React.js, receiving a 5-star review from a satisfied client who praised the quality of work and commitment to excellence.
- Collaborated with clients to gather requirements and create customized web applications that met their needs and exceeded their expectations, resulting in repeat business and positive reviews.
- Leveraged strong business acumen and communication skills to understand client requirements, provide customized solutions, and deliver high-quality web applications that met their needs and exceeded their expectations.

Frontend Developer

Golden Bird Technologies

January 2022 - August 2022, Yamunanagar, IN

- Developed scalable and responsive web applications using React.js and Node.js
- Conducted front-end coding, application design & development, and provided end-user support
- Monitored application performance and conducted regular testing to ensure the smooth running
- Collaborated with cross-functional teams to analyze and troubleshoot issues in web applications
- Optimized website speed and performance through browser testing, code optimization, and other methods
- Implemented website security measures to prevent possible security threats
- Improved website functionality and user experience through continuous development and maintenance
- Utilized version control tools such as Git for code management and collaboration with other developers

PROJECTS

Social Media App

- Designed and developed a responsive user interface using React.js, HTML, and CSS
- Integrated Firebase authentication and real-time database functionality for efficient user interaction and engagement

E-commerce Website

- Collaborated with a team of developers to build an e-commerce platform using React.js, Redux, and Bootstrap
- Designed and implemented a dynamic search functionality using API integration with third-party databases

To-Do List

- Built a responsive user interface using React.js, HTML, and CSS, with a focus on user experience and accessibility
- Implemented state management and persistent data storage using React hooks and local storage for a seamless user experience

Expense Tracker

- Designed and developed a dynamic user interface with React.js, HTML, and CSS, with an emphasis on data visualization and analytics

Recipe Search Web App

- Designed and developed a user-friendly interface with React.js, HTML, and CSS
- Implemented API integration with recipe databases, enabling users to search and filter recipes by ingredient, dietary needs, and more
